

MoolSocial YouTube current verified evidence

Bounded private-Dev owner connection, app return and official playback evidence

This pack documents only capabilities demonstrated against the Dev reviewer slice. It does not represent broad Production approval.

Submission gate: live private-upload, owner-Analytics, provider revocation and retained-data deletion evidence are not included yet. Keep those use cases out of the final form unless matching evidence is added.

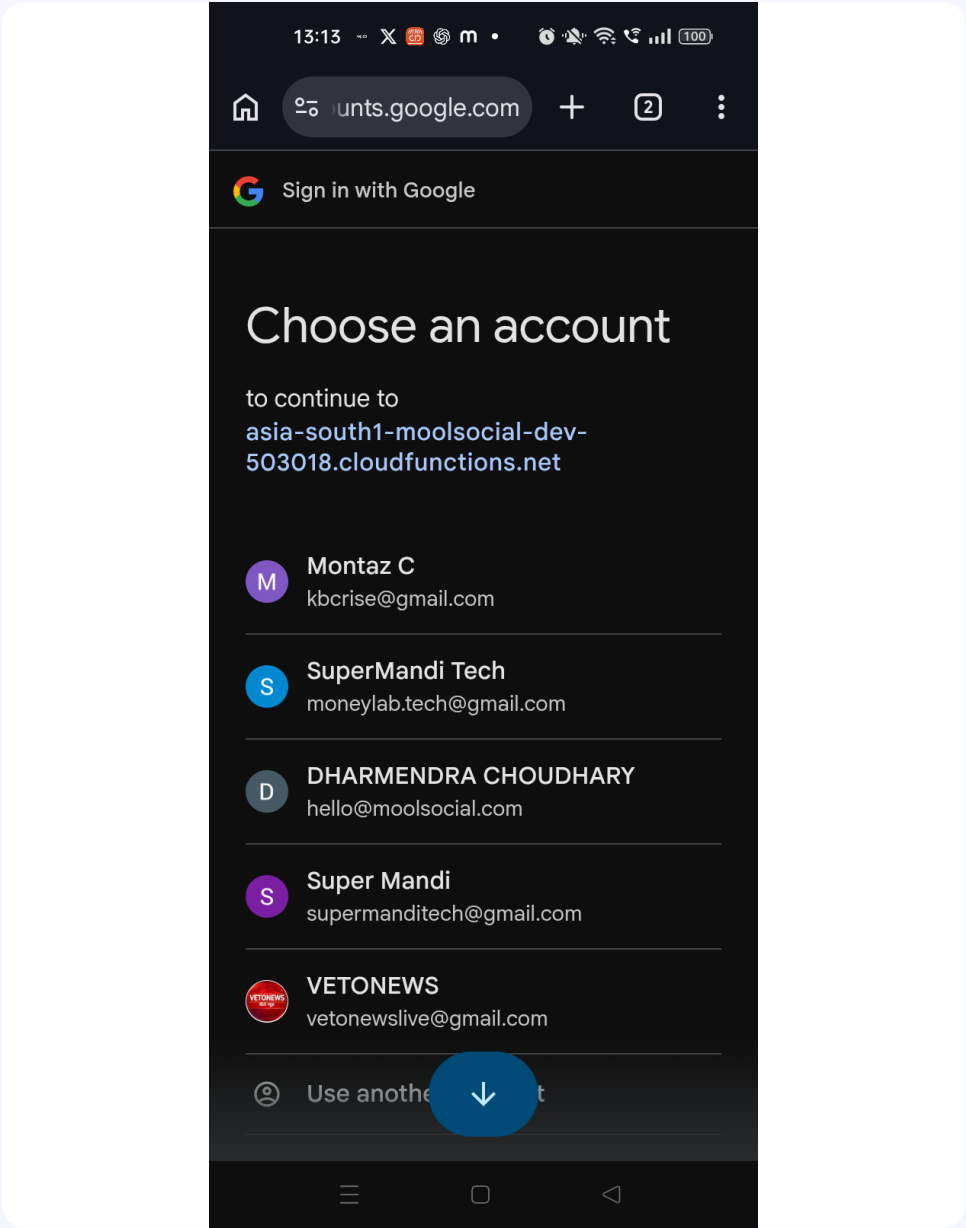

Applicant: SUPERMANDI TECH PRIVATE LIMITED

API client: MoolSocial

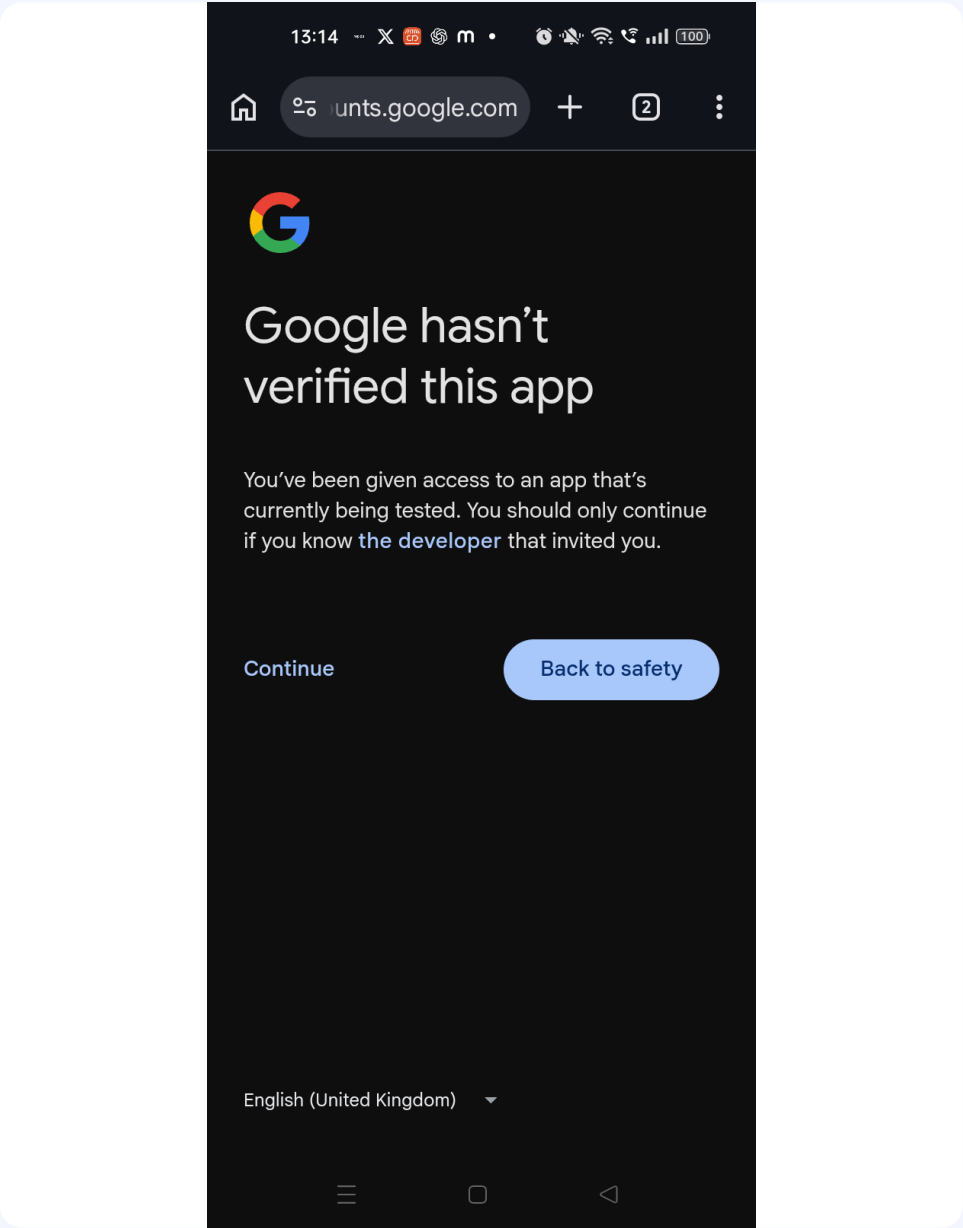

Dev project: moolsocial-dev-503018 (760290687711)

Owner-proof channel: VetoNews (UC7rn0BIzhULpyw1NYXh-mWQ)

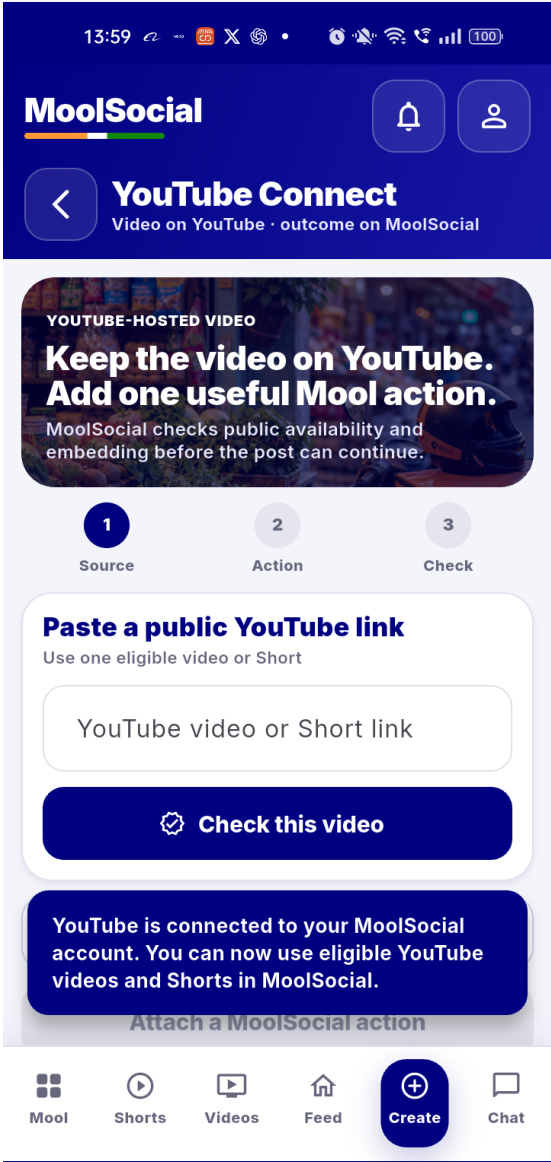

Prepared: 26 July 2026

Founder-controlled Google/brand-account selection

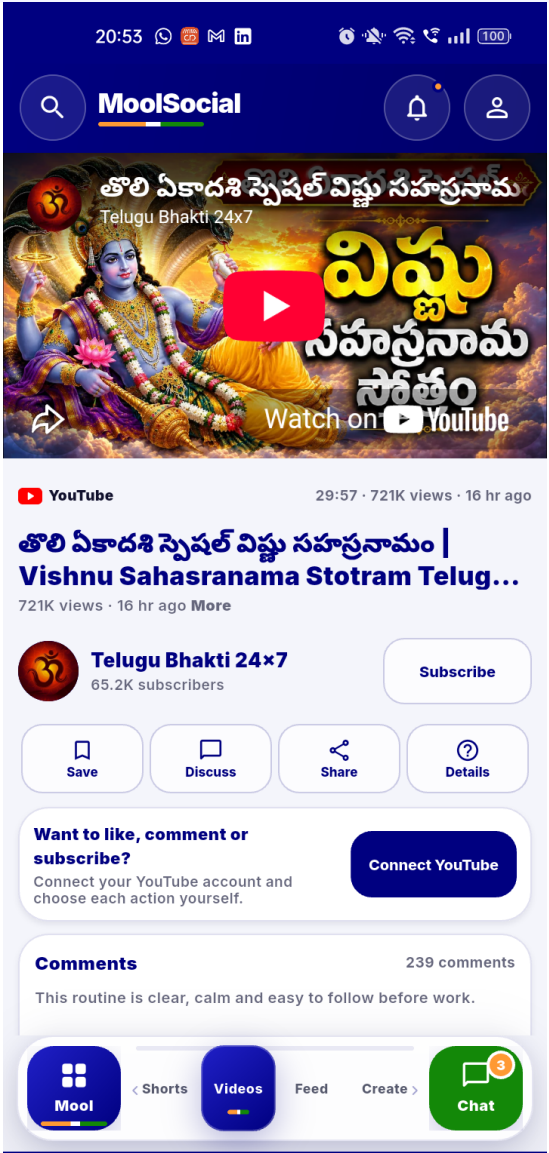

Current Dev OAuth warning - verification still pending

Token-free browser return to the same MoolSocial surface

Eligible public YouTube catalogue in the bounded Dev client

Official YouTube embedded player ready on the physical OPPO, with YouTube identity and Watch on YouTube visible. YouTube remains the host and streaming provider.

Truthful evidence boundary

- **Verified now**

Selected public metadata discovery, official embedded playback, OAuth account selection, exact app return and VetoNews channel eligibility evidence.

- **Still pending**

One private resumable upload, owner-authorised Analytics result, Google/provider revocation, retained-data deletion and representative quota measurement.

- **Environment**

Evidence targets Dev project moolsocial-dev-503018 (760290687711). Production remains a separately authorised project and approval decision.

- **Data boundary**

MoolSocial does not download, proxy or offer offline YouTube audiovisual content. Playback remains within the official YouTube player.
